

Accretion

This component allows you to create an animated accretion disc.

NOTE: This component inherits from **Ring**, so read that documentation for information about the shared settings.

Age

This allows you to set the current time of the cloud scrolling.

Time Scale

This allows you to set how fast the clouds scroll.

Dust Tex

This allows you to set the dust texture applied to the disc. When animated, this texture will appear to fall into the accretion disc.

Twist

This allows you to set how much the clouds twist.

Twist Bias

This allows you to set how far out the twisting begins.

Reverse Twist

This allows you to switch the direction of the twisting.
