Free Media Packs

If you're familiar with earlier versions of SGT, you'll notice that the current versions have less demo scenes, and less example media than before. This is because packaging 200MB of media with each build makes it tedious for you to update, import, and switch platforms. So I decided to make the main SGT package nice and simple, and offer the rest of the scenes as optional downloads for those who want the extra stuff.

Get the latest media packs from the main forum thread here: http://forum.unity3d.com/threads/space-graphics-toolkit-released.147954

If you don't see the kind of example scenes you're looking for then please feel free to post and request something, as it will benefit everyone!
